

Rotary Hand Bell

Rotary hand bells provide a simple and effective way to raise the alarm in an emergency. Suitable for use indoors and outdoors and in situations with high levels of ambient noise, such as construction sites. Rotary hand bells can be attached to a wall or onto our fire point trolleys.

- › Provides a reliable independent fire warning inside or outside.
- › Quick and simple installation and maintenance free.
- › High sound output (75dB at 20m) from the 230mm diameter die-cast aluminium bell.
- › Epoxy polyester powder coated.
